

PHOTO NOTES AI

Testing Assignment for Gabby Create and Send

How completion works

Use this PDF as your reference, but record your work inside Photo Notes. Open the account circle at the top, choose **My Testing Assignment**, and check each item as you finish it. Photo Notes saves your progress. When every item is checked, press **Submit Assignment Complete**. You do not need to email or message Sam afterward.

If something fails

Use **Report an Issue** on the page where the problem happened. Briefly say what you were trying to do, what went wrong, and what you expected. The page and device details are attached automatically. Submit each separate problem as its own report.

Shared Basic check

■	1. Sign in and open Basic Sign in on your normal phone. Confirm Photo Notes Basic opens without an error.
■	2. Take, retake, and cancel a photo Take a photo, use Retake Photo once, then cancel it. Take a new photo to continue.
■	3. Save a complete Photo Note Take a photo, record a voice note, and save it. Confirm the photo, note, GPS, address, and topic remain together.
■	4. Find and organize it Open Organize, find the Photo Note, add a title, change its topic, and confirm the changes remain after refresh.
■	5. View and zoom Open View and Zoom, move around the enlarged photo, then use Reset Photo.
■	6. Share one Photo Note Select the Photo Note in Send and use Share. Confirm the phone share sheet opens.
■	7. Report one test issue Open Report an Issue and submit a clearly labeled test report so the reporting workflow is checked too.

Gabby's focus: Create and Send

Focus on turning selected Photo Notes into a polished document and sharing it.

■	8. Build a document Create a document from several Photo Notes, change their order and captions, and review the paginated preview.
■	9. Add company branding Upload a test company logo and confirm it appears in the document preview.
■	10. Try a Word template Import a simple Word template and confirm Photo Notes recognizes it without changing the original file.
■	11. Edit the document layout Change the cover, heading, spacing, and basic layout controls, then confirm the preview updates.
■	12. Download and share formats Create PDF, Word, and Markdown outputs. Test Download, Share, and Print where available and report any confusing wording.

Finish

Return to **My Testing Assignment**. Confirm every item is checked, add any overall note you want the administrator to see, and press **Submit Assignment Complete**. Any issue that needs action should also have its own Report an Issue submission.
